PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience in designing and deploying scalable microservices using Spring Boot, Docker, Kubernetes, and AWS. Skilled in REST API design, Kafka-based asynchronous communication, and CI/CD automation using GitHub Actions. Hands-on experience deploying containerized services on AWS (EC2, S3, ECR, RDS) and implementing secure authentication with Keycloak. Worked on vehicle remarketing platforms for global clients like GMF, BMW, and Honda.

EDUCATION

•Bachelor of Technology in Computer Science and Engineering

2019–2023

Gandhi Institute of Engineering And Technology, Gunupur

CGPA: 9.07

PERSONAL PROJECTS

•Used Car Sales Portal (Work In Progress) (GitHub)

Tech: Java, Spring Boot, Spring Cloud, React, Kafka, Docker, Kubernetes, SQL, JWT, Tailwind CSS

- Designed and implemented a distributed web platform with 9 independently deployable microservices, improving request latency by 25%.
- Built secure authentication and authorization using JWT and Spring Security.
- Managed containerized environments using Docker and deployed services with Kubernetes and Helm, reducing downtime by 30%.
- Enabled real-time notifications and decoupled communication between services using Apache Kafka.

•URL Shortener (TinyURL) (GitHub)

Tech: Java, Spring Boot, Redis, Docker, Kubernetes, Helm, Minikube, GitHub Actions (CI/CD), Keycloak

- Built a distributed URL shortening service with two Spring Boot microservices and Redis-backed hash mapping system enabling constant-time lookup ($O(1)$).
- Integrated Keycloak for centralized authentication and authorization, securing access to APIs.
- Containerized services using Docker and deployed them on Kubernetes via Helm charts on Minikube.
- Automated CI/CD pipeline using GitHub Actions, reducing deployment time by 40%.

•E-Commerce Website (GitHub)

Tech: Java, Spring Boot, React, SQL

- Developed a full-stack platform with user and admin roles for managing products, orders, and cart functionality.
- Integrated frontend and backend using REST APIs and responsive UI design in React.

EXPERIENCE

•Junior Software Developer

July 2023 – Present

Amiti Software Technologies Private Limited

Bengaluru

- Delivered microservices-based vehicle remarketing solutions for clients like GMF, VW, BMW, Honda, and Hyundai.
- Engineered REST APIs and integrated JWT-based authentication for secure data transactions.
- Built and deployed containerized services using Docker and Kubernetes, managing 10+ microservices.
- Collaborated in Agile teams using Git for version control and JUnit for unit testing, ensuring 90%+ coverage.

•Advanced Robotic Process Automation (Intern)

June 2022 – May 2023

Highradius

Bhubaneswar

- Automated the Order-to-Cash cycle by building backend services for data scraping, transformation, and integration using Java, JDBC, Hibernate, and SQL.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frameworks & Libraries: Spring Boot, Spring Cloud, React, Hibernate, JSP, JUnit, Mockito

Cloud & Devops: AWS (EC2, S3, RDS, ECR, Lambda – hands on), Docker, Kubernetes, Helm, GitHub Actions, Jenkins, Git, Postman, Kafka

Database: MySQL, Redis, DynamoDB

Concepts: Microservices, RESTful APIs, JWT, OOP, DSA, HLD, LLD

Frontend: React.js, Tailwind CSS

Others: Agile, CI/CD

ACHIEVEMENTS & CERTIFICATIONS

- Spring Boot 3 in 100 Steps (Udemy), Highway to Highradius Internship, Machine Learning using Python.
- Global Rank of 17k in GeeksForGeeks for Problem Solving.
- SQL (Intermediate & Basic) – HackerRank, Python (Basic) – HackerRank.
