PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience designing and deploying scalable microservices using Spring Boot, Docker, Kubernetes, and AWS cloud services. Proven expertise in building distributed systems with REST APIs, Apache Kafka-based asynchronous communication, and CI/CD automation using GitHub Actions and Helm. Hands-on experience deploying containerized services on AWS and implementing Infrastructure as Code using Terraform. Delivered microservices architectures for vehicle remarketing platforms serving global clients like GMF and BMW.

EDUCATION

•Bachelor of Technology in Computer Science and Engineering

2019–2023

Gandhi Institute of Engineering And Technology, Gunupur

CGPA: 9.07

DEVELOPMENT PROJECTS

•Serverless Event Announcement System (GitHub)

Tech: AWS Lambda, API Gateway, DynamoDB, SNS, SQS, Terraform, S3, CloudWatch

- Deployed serverless event notification platform using Terraform IaC with 6 AWS services running entirely on AWS.
- Implemented async event processing with SQS message queues and 3 Lambda functions for decoupled architecture and improved system resilience.
- Configured CloudWatch monitoring with custom dashboard and 8 alarms tracking Lambda errors, API Gateway metrics, and SQS queue depth for proactive issue detection.
- Automated infrastructure deployment reducing manual setup time by 90% using modular Terraform code with separate files for IAM, networking, and compute resources.

•Used Car Sales Portal (Work In Progress) (GitHub)

Tech: Java, Spring Boot, Spring Cloud, React, Kafka, Docker, SQL, JWT, Tailwind CSS

- Designed and implemented a distributed web platform with 9 independently deployable microservices.
- Built secure authentication and authorization using JWT and Spring Security.
- Enabled real-time notifications and decoupled communication between services using Apache Kafka.

•URL Shortener (TinyURL) (GitHub)

Tech: Java, Spring Boot, Redis, Docker, Kubernetes, Helm, Minikube, GitHub Actions (CI/CD)

- Built a distributed URL shortening service with two Spring Boot microservices and Redis-backed hash mapping system enabling constant-time lookup ($O(1)$).
- Containerized services using Docker and deployed them on Kubernetes via Helm charts on Minikube.
- Automated CI/CD pipeline using GitHub Actions, reducing deployment time by 40%.

EXPERIENCE

•Junior Software Developer

July 2023 – Present

Amiti Software Technologies Private Limited

Bengaluru

- Delivered microservices-based vehicle remarketing solutions for clients like GMF, VW, BMW, Honda, and Hyundai.
- Engineered REST APIs and integrated JWT-based authentication for secure data transactions.
- Built and deployed containerized services using Docker and Kubernetes, managing 10+ microservices.
- Collaborated in Agile teams using Git for version control and JUnit for unit testing, ensuring 90%+ coverage.

•Advanced Robotic Process Automation (Intern)

June 2022 – May 2023

Highradius

Bhubaneswar

- Automated the Order-to-Cash cycle by building backend services for data scraping, transformation, and integration using Java, JDBC, Hibernate, and SQL.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frameworks & Libraries: Spring Boot, Spring Cloud, Hibernate, JUnit, Mockito

Cloud & Devops: AWS (EC2, S3, RDS, ECR, Lambda, SQS, SNS, Cloudwatch, API Gateway – hands on), Docker, Kubernetes, Helm, GitHub Actions, Jenkins, Git, Kafka

Database: MySQL, Redis, DynamoDB

Concepts: Microservices, RESTful APIs, JWT, DSA, HLD, LLD

Frontend: React.js, Tailwind CSS

Others: Agile, CI/CD

ACHIEVEMENTS & CERTIFICATIONS

- Spring Boot 3 in 100 Steps (Udemy), Highway to Highradius Internship, Machine Learning using Python.
- Global Rank of 17k in GeeksForGeeks for Problem Solving.
- SQL (Intermediate & Basic) – HackerRank, Python (Basic) – HackerRank.
